

webapp2

Assignment 2 Automated development process(about a online forum)

Name: ZitingWang

StudentID: 20082254

Overview

This Vue project can perform all the operations inside assignment1 on the webpage, such as adding, modifying, deleting and finding. At the same time, by using api and firebase, users can also view Google Maps and log in using Google account, email, etc.

E2E Testing

```
$ npx cypress run
```

| Spec | | | Tests | Passing | Failing |
|------------------------------|---------|-------|-------|---------|---------|
| Pending | Skipped | | | | |
| ✓ examples/home-page.spec.js | | 00:03 | 3 | 3 | - |
| - - | | | | | |
| ✓ examples/login.spec.js | | 00:02 | 2 | 2 | - |
| - - | | | | | |
| ✓ examples/Post.spec.js | | 00:03 | 2 | 2 | - |
| - - | | | | | |
| ✓ examples/Posts.spec.js | | 00:16 | 4 | 4 | - |
| - - | | | | | |
| All specs passed! | | 00:25 | 11 | 11 | - |
| - - | | | | | |

The command "npx cypress run" exited with 0.

Continuous Integration.

Travis Build Page For The My Vue App

Automated Deployment.

Auto-deployed of My Vue app

Github

My Github Link for Vue Client

Extra features

**Use the cypress, e2etest, Bundling (Webpack), custom build, eslint and so on.
And deploying in surge, github, firebase and travis.**
